LIST OF CONTENTS

Number 1

A. Delahaigue, C. Thiebeaux, D. Courtois and H. le Corre	1	Design of a sun tracker for a Laser Heterodyne Spectrometer
L. B. Whitbourn, J. C. Macfarlane, P. A. Stimson, B. W. James and I. S. Falconer	7	An experimental study of a CW optically pumped far infrared formic acid vapour laser
C. Degli Esposti, G. Cazzoli, D. Damiani, P. G. Favero and F. Strumia	21	Dipole moment of HCN by microwave-Stark saturated absorption spectroscopy
R. G. Humphreys	29	Specification of infrared detectors and arrays
N. L. Rowell	37	Infrared photoluminescence of intrinsic InSb
J. T. Rayner, T. C. Chuter, I. S. McLean, J. V. Radostitz and I. G. Nolt	43	A variable conductance gas switch for intermediate temperature operation of liquid He/liquid N_2 cryostats
C. Jagadish, A. L. Dawar and P. C. Mathur	55	Effect of antimony on the electrical properties of $Pb_{0.8}Sn_{0.2}Te$ thin films
Patents Section	I	

Number 2

S. D. Gunapala and D. D. Coon	61	High-performance integrating infrared detector
P. Stützel, H. D. Tegtmeier and M. Tacke	67	The FIR refractive index of polymers determined by the Abbe technique
K. Janulewicz and R. Jarocki	73	A simple retropulse isolator for CO_2 laser radiation
V. Ramakrishnan and G. Aruldhas	77	IR and polarised Raman studies of $(NH_4)_2HPO_4$
W. Quapp and D. Heidrich	83	Interpretation of the IR spectral intensity anomaly of HCN by potential energy surface bifurcation along a normal mode
Naoki Oda	91	Temperature dependence of ambipolar mobility for a 0.1 eV *n*-type HgCdTe photoconductor
N. Mirowska, J. Szatkowski and Z. Gumienny	97	Photoelectric properties of undoped and Cd-doped Zn_3P_2–Mg junctions
K. Józwikowski and A. Rogalski	101	Intrinsic carrier concentrations and effective masses in the potential infrared detector material, $Hg_{1-x}Zn_xTe$
P. L. Polavarapu	109	Far infrared circular dichroism measurements with Martin–Puplett interferometer: methods and analysis
R. G. Humphreys and H. A. Tarry	113	An optically coupled thermal imager
J. C. G. Lesurf	129	Gaussian beam-mode optics and the design of millimetre-wave Martin–Puplett instruments
Patents Section	I	

Number 3

Editorial	i	
A. Rogalski	139	Analysis of the R_0A product in n^+–p $Hg_{1-x}Cd_xTe$ photodiodes

G. Dall'Oglio, P. de Bernardis, S. Masi, B. Melchiorri, A. Moleti, W. Pecorella and L. Pizzo	155	Atmospheric transmission and noise measurements in Antarctica
G. C. Bhar, N. P. Ghosh and S. Das	163	A simple technique for separation of laser beams in collinear frequency mixing
J. Léotin, S. Barré, C. Laverny, M. Goiran and J. R. Birch	165	The far-infrared optical constants, quantum efficiency and internal quantum yield of detector-quality gallium-doped germanium
N. Sclar	173	Cold radiation shields for IR detector arrays
J. M. Pawlikowski	177	Zn_3P_2 as infrared-to-ultraviolet photoconverter
G. Strazzulla, P. Massimino, F. Spinella, L. Calcagno and A. M. Foti	183	IR spectra of irradiated organic materials
Xavier Mathew and V. U. Nayar	189	Vibrational spectra of three zirconium phosphates
Technical Notes		
K. C. Liddiard	195	A novel focal plane scanning technique
M. R. Belmont and A. H. Ambarek	199	Far infrared absorption spectra of the anymnetric addition of NEM and EMB to egg albumen
Patents Section	I	

Number 4

V. Ramakrishnan and Joseph M. T. Maroor	201	IR and Raman studies of gel grown manganese tartrate
Pang Si-Jie and Wen Yao-Pu	205	A low-temperature large-area blackbody radiant source with heat pipe
J. Misiewicz	215	The room temperature photoconductivity in Zn_3P_2
I. Boscolo and P. Bernardini	219	A high performance FIR laser cavity
A. D. DeBellis and M. J. D. Low	225	Dispersive infrared phase angle photothermal beam deflection spectroscopy
J. R. Birch	239	Incoherent co-adding of interferograms
P. de Bernardis, M. De Petris, M. Epifani, M. Gervasi, G. Guarini and S. Masi	243	A balloon borne millimetric telescope: experimental study of the thermal gradients on the primary mirror
E. Placzek-Popko and L. Jedral	249	Dark current in far-infrared $Hg_{(1-x-y)}Cd_xMn_yTe$ detectors
S. P. Braim	255	Technique for the analysis of data from an imaging infrared radiometer
H. J. Sajosch	263	The influence of temperature gradients on the dynamic pyroelectric current in monoaxial ferroelectrics having a second order phase transformation
A. B. Dean, P. N. J. Dennis, C. T. Elliott, D. Hibbert and J. T. M. Wotherspoon	271	The serial addition of SPRITE infrared detectors
Corrigendum	I	

Number 5

M. J. Małachowski, J. Piotrowski and A. Rogalski	279	Influence of dislocations on the performance of $Hg_{1-x}Cd_xTe$ graded gap photoresistors
S. J. Sheard and M. G. Somekh	287	Semiconductor assessment using photothermal radiometry

Guan-Rong Tan, Wen-Xia Yang, Ming-Xia Guo, Yan Sui, Ru-Lian Fu and Gui-Yan Kai	293	Disturbance of the combination frequency in the detection of a Doppler-free laser optoacoustic signal
R. R. J. Goulding, C. Young, R. M. Lees, W. Lewis-Bevan and J. W. C. Johns	297	Doppler-free optoacoustic spectroscopy of O-18 methanol
N. N. Grigor'ev, T. A. Kudykina, S. V. Plyatsko and F. F. Sizov	307	Heating of inclusions by intense laser radiation in transparent narrow-gap IV–VI semiconductors
T. Niedziela, A. Rogalski and J. Piotrowski	311	Calculation of the carrier lifetime in $Hg_{1-x}Zn_xTe$
Yuan-Pern Lee and J. F. Ogilvie	321	Strengths of absorption lines in the vibration–rotational band $v = 5 \leftarrow v = 0$ of NO $X^2\Pi_r$
H. J. Sajosch and R. Wrzalik	325	Switching of the pyroelectric current in TGS crystals
H. Finkenrath†	327	The Moss rule and the influence of doping on the optical dielectric constant of semiconductors—I
R. Gajić and M. J. Merkle	333	Signal averaging in Fourier-transform spectroscopy (two-sided interferogram)
H. A. Gebbie and N. Apsley	337	Measurements of power gain showing millimetre wave maser action in water vapour
D. G. Murcray, F. H. Murcray and H. A. Gebbie	341	Effect of sunlight on stratospheric emission at 10–12 microns
J. R. Birch	345	Pseudocoherence in dispersive Fourier transform spectroscopy
R. Risaliti, L. Ronchi and A. Scordino	353	Modified Ledatron and Orotron tubes with improved sub-mm performance
Corrigendum	I	

Number 6

H. Finkenrath†	363	The Moss rule and the influence of doping on the optical dielectric constant of semiconductors—II
I. Boscolo and A. Pando	367	On the modal expansion and equivalent circuit model of meshes for normal and off-normal incidence
A. P. Davis and A. M. White	375	Modelling of two-dimensional photodiode arrays by random walk spot-scan simulation
A. Bianco, E. Bussoletti, L. Colangeli, S. Fonti and V. Orofino	383	Raman spectra of submicron amorphous carbon grains and mixtures of polycyclic aromatic hydrocarbons
M. Baleva, P. Gergova and M. Sendova	389	Photoconductivity of laser-deposited $Pb_{1-x}Cd_xSe$ films
A. Augustinus, J. F. Kusters, B. J. Rye, J. W. van Dijk and W. Wolters	397	Computer control of frequency tunable CO_2 lasers
A. Plettl	405	Influence of transverse feedback on an optically pumped mirrorless sub-mm laser
M. Baleva and S. Kollashev	413	The optical dielectric constant in A^4B^6 compounds
D. Lubzens, D. Rosenfeld and Y. Nemirovsky	417	The noise equivalent temperature difference performance of HgCdTe photodiode array

J. R. Birch 425 Pseudocoherence in dispersive Fourier transform spectroscopy—II. Reflection DFTS

A. W. R. Leitch and H. L. Ehlers 433 The characterization of GaAs and AlGaAs by photoluminescence
